

INVITATION

Overcoming barriers of
lignin commercialization
**Lignin Ecosystem
Workshop**

CEFIC/Pöyry

Thursday 28th Sept 2017

Avenue Van Nieuwenhuyse 4, B-1160 Brussels

Lignin Club partners

Unlocking the enormous potential of lignin holds the key for a more sustainable future. The Lignin Ecosystem has a vision to overcome barriers of lignin commercialization by bringing together potential and existing lignin producers, end-users and technology developers.

Pöyry/CEFIC workshop aim is to identify lignin value chains and create a road map for future market developments.

The Lignin Club members are pleased to invite you to an afternoon workshop for in dept discussion with a limited number of experts. Your input is important to us.

Programme

I Is lignin finally shifting towards growth?

Lignin: Becoming a Business

Introducing the Lignin Matrix and the Lignin Club (Pöyry)

II Lignin: Showing the lignin value chain via presentations from Lignin Club members

Production: Towards a tipping point for lignin availability

Andritz

Metsä Fibre

Sappi

St1 & NEOT

UPM

Technology: From extraction to purification, delivering the valuable feedstock

Andritz

CH-Bioforce

MetGen

VTT

End uses: Summary of end use streams in Lignin Club

Pöyry

III Linking chemical industry to the lignin flows, technology and uses

Panel Discussion

Lignin and Chemical Industry

Overcoming barriers of lignin commercialization Lignin Ecosystem Workshop

CEFIC/Pöyry

Thursday 28th Sept 2017

Avenue Van Nieuwenhuyse 4, B-1160 Brussels

Looking forward to seeing you at our event,

Dr. Petri Vasara
Vice President

In the Lignin Ecosystem, we aim to accelerate the market development of lignin by bringing together potential and existing lignin producers, end-users and technology developers. We promote credible supply chains, organise workshops and meetings, catalyse development projects as well as create application know-how to overcome the barriers of lignin commercialisation.

The Project is coordinated by Pöyry Management Consulting Oy and is funded by Tekes and members of the Lignin Club.
